Fish Hatchery Hearing

Good morning Kluesner,,

NEWARK BOARD OF ADJUSTMENT
Special Public Meeting
Council Chambers
April 3, 2014
7:00 P.M.

It has been noted that the application for a fish hatchery below is being offered in lieu of giving the residents of Newark the full clean up of the river that they deserve. The reasoning was with a source of clean fish there is less need for a full cleaning of the contamination put into the river by certain corporations that took their profits and left Newark to take care of the pollution they caused.

There is no guarantee how long these structure will operate if approved

There is no guarantee how many people will be employed and how long.

There is no explanation of how the uncontaminated fish will even get to the river where they are supposed to be exchanged.

Furthermore, fish hatcheries are known for the odors caused by dead fish, uneaten food, and fish waste. Potentially these wastes would be released into the sewer system to be eventually released into the river where more problems could develop. Come out to the board meeting to stand against this new problem in the neighborhood and stand up for a complete cleaning of the

Passaic River.

New Application:
6-14-A Ward: Central

PREMISES: Premises: 18-24 Prince Street, Block 235, Lot 48

APPLICANT: Metropolitan Resurrection Community Development Corporation

TO PERMIT: In the University Heights Redevelopment Plan Area, proposed establishment of an Aquaponic System including a fish hatchery and greenhouse. Fish Hatchery is prohibited under the University Heights Redevelopment Plan. Aquaponic Training Center is also prohibited in II Zone. Seeking D Variance for Fish Hatchery and Aquaponic Training Center; C Variances for insufficient front yard, side yard and parking. Preliminary and Final Site Plan approval required. Formal Action will be taken.
